

BAU 2017, Munich. We seal with air.

Without question, BAU 2017 in Munich is the most important trade fair in Europe for companies that plan, construct and design buildings. The figures are a testament to this: 2,000 exhibitors offer more than 250,000 visitors a glimpse into the future of construction across 17 halls. The air-lux stand is no different, showcasing new, unmissable innovations.

**There's no better way to seal.**

The frameless, floor and ceiling-flush air-lux façade system guarantees the greatest sealing quality in the world. See for yourself that this is no exaggeration – experience our products first-hand at the air-lux trade fair stand.

Learn from a world record holder.

Extreme mountaineer Ueli Steck holds the record for the fastest ascent of the north face of the Eiger and climbed all 82 four-thousanders in the Alps in just 62 days – the feat of a perfectionist. Steck is happy to share his thoughts on his association with air-lux, how his expeditions have changed him and how we can all apply what he's learned to our everyday life at our trade fair stand.

**Meet Ueli Steck in person.**

Ueli Steck is a fascinating icon. On 19 and 20 January 2017, at 11 am and 2 pm respectively, we will offer you the opportunity to meet the air-lux brand ambassador in person at our trade fair stand.

See for yourself – don't miss this chance to visit the air-lux trade fair stand. Even more exciting demonstrations and information await you. Visit us at stand 218 in hall C2.

We look forward to welcoming you.
